PROFILE

AI automation engineer with ten years in finance operations and an MBA. Builds workflows and AI agents in n8n with Claude, OpenAI and the business tools teams already use. Having run invoicing, reconciliation, reporting and approvals by hand, designs automations around real business rules and controls — documented and maintainable, so the people who inherit them can run them.

SKILLS

Automation
n8n (cloud & self-hosted), Zapier, Make; workflow design, triggers, webhooks

AI / LLM
Claude, OpenAI, Gemini, Groq APIs; prompt engineering; AI agents; RAG (Pinecone); voice agents (VAPI)

Integration
REST APIs, JSON, Google Workspace, Airtable, Slack, Gmail, QuickBooks, Pipedrive, Apollo, PostgreSQL

Accounting & Finance
Financial statements, month-end close, AP/AR, reconciliation, cost & variance analysis, tax compliance, DCF valuation & forecasting; QuickBooks, SAP, Sage, Excel (advanced)

PROJECTS

End-to-end automations built in n8n, documented on my portfolio. View all 7 projects

AI Invoice Processing & Approval

Sample client build · Sep 2026

n8n · OpenAI · Gmail · Airtable · Slack · QuickBooks

Reads invoices from Gmail, skips duplicates and has AI extract the details, then checks each against the purchase order and delivery record before Slack approval and posting to QuickBooks. Built for construction billing: progress payments, retention and lien waivers.

AI Unpaid Invoice Reminders

Sample client build · Sep 2026

n8n · QuickBooks · Pipedrive · PostgreSQL · OpenAI · Gmail · Slack

Checks QuickBooks, Pipedrive and the collections database every morning and sends reminders by set rules. AI writes the emails and reads customer replies; a dispute stops all reminders until a person resolves it.

AI Appointment Setter

Aug 2026

n8n · VAPI · Google Calendar · Airtable

VAPI voice agent backed by n8n webhooks that checks Google Calendar availability and books, reschedules and cancels appointments in real time — logging bookings and call results to Airtable.

HR Evaluation and Job Posting Assistant with AI

Aug 2026

n8n · Groq · OpenAI · Airtable · Gmail · Google Calendar

Takes applications by form and uses an AI agent to evaluate each CV against its job posting, tagging candidates as potential hire or rejected. Shortlisted candidates get a tailored questionnaire, a personal interview invitation via Gmail and a booked slot in Google Calendar; the interviewer gets screening questions.

EXPERIENCE

Financial Analyst
Jun 2022 — Present

My Mountain Mover (Independent Contractor) · United States, Remote

- Maintain DCF valuation models and financial statement forecasts across a portfolio of listed companies, turning earnings-call and investor guidance into revised assumptions each quarter.
- Use Claude and other AI tools daily to accelerate research, analysis and reporting.

Course Instructor
Dec 2020 — May 2023

Xavier University – Ateneo de Cagayan · Cagayan de Oro

- Taught business, finance and accounting courses, breaking complex processes into clear, step-by-step systems.

Johndorf Ventures Corporation
Jul 2015 — Mar 2021

Real estate developer · Cagayan de Oro

Branch Accountant
Apr 2020 — Mar 2021

- Led a 10-person accounting team delivering monthly and annual financial statements on a fixed close cycle.
- Owned and documented close, reconciliation and approval processes across AP, AR and disbursement — the process mapping automation work depends on.

Project Cost Accountant
Aug 2016 — Apr 2020

- Performed standard costing and variance analysis; reconciled material, labor and overhead costs against the item ledger.
- Built and maintained recurring cost and project reporting workbooks.

Accounts Payable Supervisor / Tax Compliance Analyst
Jul 2015 — Oct 2018

- Supervised the full AP cycle: invoice processing, vendor reconciliation, aging and voucher controls.
- Managed statutory tax compliance and filing calendars — high-volume, rules-based, deadline-driven work.
