SUMMARY

AI automation specialist with more than ten years in finance and accounting and an MBA. Builds workflows and AI agents in n8n, Zapier and Make, connected to the business tools teams already use. Having run invoicing, reconciliation, reporting and approvals by hand, designs automations around real business rules and controls, documented and maintainable so the people who inherit them can run them.

SKILLS

Automation: n8n (cloud and self-hosted), Zapier, Make; workflow design, triggers, webhooks, error handling

AI and LLM: OpenAI, Claude, Gemini and Groq APIs; prompt engineering; AI agents; RAG (Pinecone); voice agents (VAPI)

Integration: REST APIs, JSON, Google Workspace, Airtable, Slack, Gmail, QuickBooks, Pipedrive, Apollo, PostgreSQL

Accounting and finance: financial statements, month-end close, accounts payable and receivable, account reconciliation, audit, cost and variance analysis, tax compliance, DCF valuation and forecasting; QuickBooks, SAP, Sage, Excel (advanced)

EXPERIENCE

Financial Analyst
Jun 2022 - Present

My Mountain Mover (Independent Contractor) | United States, Remote

- Maintain DCF valuation models and financial statement forecasts across a portfolio of US-listed companies.
- Turn earnings calls and investor guidance into revised assumptions every quarter, so each model reflects the latest numbers.
- Research filings and market data and turn them into structured reports.

Course Instructor
Dec 2020 - May 2023

Xavier University - Ateneo de Cagayan | Cagayan de Oro, Philippines

- Taught business, finance and accounting courses, breaking complex processes into clear, step-by-step systems.

Branch Accountant
Apr 2020 - Mar 2021

Johndorf Ventures Corporation | Cagayan de Oro, Philippines

- Led a 10-person accounting team delivering monthly and annual financial statements on a fixed close cycle.
- Owned and documented the month-end close, account reconciliations and approval processes across accounts payable, accounts receivable and disbursements in SAP.

Project Cost Accountant
Aug 2016 - Apr 2020

Johndorf Ventures Corporation | Cagayan de Oro, Philippines

- Performed standard costing and budget-versus-actual variance analysis on the developer's projects.
- Reconciled material, labor and overhead costs against the item ledger; built and maintained recurring cost and project reporting workbooks.

Accounts Payable Supervisor and Tax Compliance Analyst
Jul 2015 - Oct 2018

Johndorf Ventures Corporation | Cagayan de Oro, Philippines

- Supervised the full accounts payable cycle: invoice processing, vendor reconciliation, aging and voucher controls.
- Managed statutory tax compliance and the filing calendar, so every return was filed on time.

Accounting and Audit Staff
Oct 2013 - May 2014

Vallejera Accounting Firm | Cagayan de Oro, Philippines

- Prepared client financial statements, notes and audit reports; performed audit work on cash, property and equipment, accounts receivable and accounts payable.
- Recorded client sales, purchases and expenses and filed VAT, percentage, withholding and income tax returns using QuickBooks.

PROJECTS

End-to-end automations built in n8n, with write-ups at ramonvallejera.com and workflows at github.com/ramonaljr.

AI Invoice Processing and Approval Sep 2026

Sample client build | n8n, OpenAI, Gmail, Airtable, Slack, QuickBooks

Reads invoices from Gmail, skips duplicates and has AI extract the details, then checks each against the purchase order and delivery record before Slack approval and posting to QuickBooks. Built for construction billing: progress payments, retention and lien waivers.

ramonvallejera.com/case-study/ai-invoice-processing-approval

AI Unpaid Invoice Reminders Sep 2026

Sample client build | n8n, QuickBooks, Pipedrive, PostgreSQL, OpenAI, Gmail, Slack

Checks QuickBooks, Pipedrive and the collections database every morning and sends reminders by set rules. AI writes the emails and reads customer replies; a dispute stops all reminders until a person resolves it.

ramonvallejera.com/case-study/ai-unpaid-invoice-reminders

AI Appointment Setter Aug 2026

n8n, VAPI, Google Calendar, Airtable

VAPI voice agent backed by n8n webhooks that checks Google Calendar availability and books, reschedules and cancels appointments in real time, logging bookings and call results to Airtable.

ramonvallejera.com/case-study/ai-appointment-setter

HR Evaluation and Job Posting Assistant with AI Aug 2026

n8n, Groq, OpenAI, Airtable, Gmail, Google Calendar

Takes applications by form and uses an AI agent to evaluate each CV against its job posting, tagging candidates as potential hire or rejected. Shortlisted candidates get a tailored questionnaire, a personal interview invitation via Gmail and a booked slot in Google Calendar; the interviewer gets screening questions.
